throughout 2019, contributing to increased uncertainty in the global trading system. Projections for global growth have been downgraded to 3% in 2019 according to the International Monetary Fund. This would represent the lowest growth since 2008-09. UK GDP growth was flat in the three months to October, following growth of 0.3% in Q3. The service sector was the only sector to see growth over this period, whilst output in both the	UK GDP, 2017-19 0.7 0.8 0.6 40 0.5 0.1 0.1 0.1 0.1 0.1 0.1 0.	⇔	Economic headlines	Businesses were more positive about the outlook in Q4 2019, particularly driven by stronger activity in domestic markets towards the end of the year. Export activity remains subdued, however with activity falling in the service sector and largely flat among manufacturers. Whilst Brexit is likely part of the explanation, the broader slowdown in activity internationally is also a factor.	Profitability expectations, 2012-19
