

## PRUDENTIAL FUNDING STATEMENT

- 1 This statement has been prepared in accordance with the CIPFA Code of Practice 'Treasury Management in Local Authorities' which is re-adopted each year by Members of the Authority. The statement and its implementation are currently reviewed and updated twice annually, in the final accounts and budget reports.
- 2 The Local Government Act 2003 and Local Authorities (Capital Finance and Accounting) Regulations 2003 set out the system of capital finance to be followed by all local authorities from 2004. This appendix is intended to take account of the requirements of the regulations and to set them in the context of the Treasury Management Code of Practice.
- 3 The borrowing is required to support the delivery of the full West Yorkshire plus Transport Fund and to support internal capital. Estimates of the likely funding required are set out in the capital annex below and further work is underway to ensure there is a full robust programme of delivery for all schemes that will enable the borrowing requirements for future years to be fully understood. In the short term new borrowing requirements are likely to be reduced using cash and available reserves.

### Treasury management activity – borrowing and investments

	£m
<b>Total Loans outstanding at 01/04/2019</b>	
Fixed Term I Fixed (incl fixed interest loans)	75.0
Activity expected during 2019/20	
Loan repayments	0.0
Net movement in temporary loans	0.0
New borrowing	0.0
<b>Anticipated loans outstanding at 31/03/2020:</b>	<u>75.0</u>
Activity expected during 2020/21	
New borrowing	0.0
Borrowing Repaid	0.0
<b>Anticipated loans outstanding at 31/03/2021:</b>	<u>75.0</u>
<b>Total Investments</b>	
Investments at 01/04/2019	156.7
Net of new investment/repaid in year	119.0
<b>Anticipated Investments placed at 31/03/2020</b>	<u>275.7</u>

- 4 The current financial year has seen generally a continuation of the overall economic situation. Interest rates have remained low at 0.75%. The impact of Brexit continues to be an additional source of uncertainty to markets in forecasting GDP growth and inflation. It is likely that further upwards moves in the bank rate will be brought forward slowly. Therefore, opportunities both to refinance loans and to place money on the market at competitive rates remain limited.

- 5 Leeds City Council undertakes the monitoring of the financial markets on behalf of the Combined Authority. The agreed policy is to seek to minimise the rates at which the Combined Authority borrows and to continue to refinance any longer term loans if rates appear advantageous.
- 6 No such opportunities have arisen so far in 2019/20. The Combined Authority has a loan portfolio with competitive rates and the economic climate has been such that there have been no suitable opportunities identified for refinancing.
- 7 The business planning and budget report sets out the estimated requirement for borrowing to supplement the capital grants received. The calculations in the annex demonstrate how this works through the capital financing requirement and set out the financing costs which are then included within the revenue budget.
- 8 Since April 2015 when the Combined Authority became the accountable body for the Leeds City Region Enterprise Partnership (LEP) cash balances have been high as a result of the Growth Deal funding and Leeds Public Transport Investment Programme (LPTIP) paid in large instalments at the start of each financial year. Over the past three years the limits and counterparties have been kept under regular review to ensure the sums available for investment are able to be placed appropriately. The Combined Authority has continued to utilise call arrangements in place with Svenska and Leeds City Council rather than leave money overnight in the main NatWest account whose rate is lower at 0.30%. For longer term deposits the selected counterparties are constantly monitored and meet the strict eligibility criteria stipulated under Leeds City Council's investment policy which has been adopted by the Combined Authority. This approach will continue during 2020/21 with an expectation that the Combined Authority will continue to have high cash balances to invest due to the advance payment of capital and other grant funding. Within the existing policy the Combined Authority can also invest in money market funds and this opportunity may also be taken to enable effective management of what is expected to be further significant cash advances 2020/21 of Growth Deal, LPTIP and other capital funding initiatives.
- 9 The general level of borrowing and investments is handled efficiently by Leeds City Council and has produced a situation where the Combined Authority has, in relative terms, very low borrowing costs. Regular meetings are held with the Leeds City Council staff who undertake treasury work for the Combined Authority under the terms of a signed service level agreement, and these meetings ensure a satisfactory level of control and monitoring is achieved. These meetings also consider the overall treasury management strategy and ensure that the policies in place continue to be appropriate to ensure that the Combined Authority's funds are managed in the most effective and secure way.
- 10 The Combined Authority has strict rules on investment criteria which are set out in paragraphs 11 to 13 for consideration and re-approval. These are set to minimise the risk to the Combined Authority's funds but does also mean that interest earned on deposits is lower than it could be. It is therefore in the Combined Authority's interest to seek to utilise any cash balances to reduce the costs of long term borrowing and this policy will continue to be pursued if

possible. The increase to the Public Works Loan Board (PWLB) rates, initially announced in October 2010, reduced the opportunities to repay long term debt without incurring extra cost. The PWLB rates were later improved through the introduction of a certainty rate reduction but discount rates have not changed and it is these rates that are used to determine premiums and discounts on loan repayments. The Combined Authority would incur significant premiums by repaying borrowing but will review this situation as and when interest rates start to rise.

### **Treasury Management Activity – Investments Criteria**

- 11 In general it is intended there should be no long term investments by the Combined Authority with any surplus cash being invested short term up to a maximum term of one year. The level of future investments will fluctuate on a short-term basis due to cash flow requirements but will be maintained as low as possible. Any investments undertaken by the Combined Authority follow the guidance of the Ministry for Housing, Communities and Local Government ((MHCLG) having regard to the concept of security, liquidity and then yield with emphasis being placed on the “return of funds” rather than the “return on funds”.
- 12 It is proposed that the existing policy of utilising the expertise of the Treasury Management Team in Leeds City Council be reaffirmed for 2020/21.
- 13 The Combined Authority has several rules in place for short term investments/borrowing, as set out below and that these should continue to be applied, with changes highlighted in bold below: -
  - a. The Chief Financial Officer shall determine the amounts and periods.
  - b. The procedural document as approved for their Treasury Management Division by Leeds City Council shall be adopted in relation to the Combined Authority’s short-term investments encompassing the Council’s list of approved financial organisations and the maximum lending limits per organisation, as specified in that document from time to time.
  - c. No investment will be for a period exceeding 12 months other than with other local authorities and then only for a period not exceeding 36 months. The limits for each of the next three years are that for investments for a period greater than 364 days, that no more than £20 million will mature in each of 2020/21, 2021/22 and 2022/23.
  - d. Investments with Leeds City Council will not exceed £15 million, the interest rate for such deposits being agreed between the Chief Financial Officers of both organisations.
  - e. Investments with any one counterparty should not exceed £15 million other than in c above.
  - f. Investments with the Combined Authority’s bankers are specifically excluded from the limits set out, in recognition of the fluidity of such arrangements.

- 14 The proposals above would provide the flexibility for the Combined Authority to invest its surplus funds which, as they are expected to continue to increase, will become increasingly difficult to place on the market. The proposals are deemed low risk and are in accordance with the criteria applied by Leeds City Council to its treasury arrangements.

## **PRUDENTIAL FUNDING ARRANGEMENTS**

- 15 The principal purpose of the prudential system is to allow authorities as much financial freedom as possible whilst requiring them to act prudently. There will be no government borrowing approvals issued but restrictions are imposed through the CIPFA Prudential Code which requires every authority to set prudential indicators and limits and thus be satisfied that it can afford the results of its borrowing. These limits, which must not be exceeded, must be formally agreed by the authority before the start of each financial year. The government has retained the power to, if it so wishes, limit the level of borrowing incurred by authorities.
- 16 The Prudential Code for capital was updated in December 2018 and implemented from 2019/20 financial year. In summary it re-emphasises that local authorities must ensure that all its capital and investment plans and borrowing are prudent and sustainable. In doing so it will consider its arrangements for the repayment of debt and consideration of risk and the impact, and potential impact, on the authority's overall fiscal sustainability. While indicators for sustainability are required to be set over a minimum three year rolling period, indicators should be set in line with a capital strategy and asset management plan that is sustainable over the longer term.
- 17 A capital strategy is to demonstrate that the Combined Authority takes capital expenditure and investment decisions in line with service objectives and properly takes account of stewardship, value for money, prudence, sustainability and affordability. The Capital Strategy approved in April 2019 is being reviewed and updated, and will be submitted for approval to the Combined Authority in April 2020.
- 18 The Code requires full capital and revenue plans to be prepared for at least three years forward in order to assess the financial effects of the planned capital investment. In the Combined Authority the three year financial strategy is considered by Members on a regular basis and to ensure a level of affordability it is currently the policy that borrowing to meet capital expenditure will be limited to proposed levels. Restricting borrowing in this way ensures that all debt charges are covered by the Combined Authority through its levy on the Districts.
- 19 The capital programme is considered in detail earlier in this report. It should be noted that in accordance with the above, overall capital expenditure will be met firstly by grants and other resources leaving the balance to be met by borrowing or through charges to revenue.
- 20 There are significant levels of grant provided to the Combined Authority under the Integrated Transport block (LTP), Leeds Public Transport Investment Programme (LPTIP) and Growth Deal for next year, and with the prospect of

future funds through any successor to these programmes. Recognising the demands upon infrastructure investment it is proposed that other alternative methods of financing during the year remain under consideration as and when appropriate. The financial viability and value for money of such methods will require investigation and savings found within the budget to accommodate the costs involved. Members will be asked to approve any such methods before they are implemented.

- 21 Discussions were concluded, following approval to do so in 2016, with the European Investment Bank (EIB) regarding the provision of an option whereby it could provide a flexible financing offer to support the West Yorkshire Plus Transport Fund. Many of the schemes in the Fund meet the EIB funding criteria and this provides an attractive alternative to the traditional PWLB lending. A final contract has been entered into for a five year borrowing facility. The UK's decision to withdraw from the European Union does not preclude this arrangement taking place.
- 22 It is not proposed at this stage that the Combined Authority enter any credit arrangements as defined by the regulations, other than as described above. If and when these are to be progressed then it should be recognised that they would be classified as borrowing and would need to be recognised in the operational boundary and authorised limit approval. Should any such arrangements be required these will be expected to be funded within the approved strategy.
- 23 When Leeds City Council and the Combined Authority last reviewed the borrowing limits in the light of market rates they determined that they would allow the limit to be set at a level sufficient for the current year plus the equivalent of two years anticipated borrowing requirement which is derived from the capital allocations. This was intended to provide flexibility for fund management allowing borrowing to take place when rates are low rather than being tied into strictly annual borrowing.
- 24 The Annex initially creates limits set at the required level of borrowing for 2020/21 and 2021/22. To provide more flexibility in managing the funding operation it was previously agreed that approval be given to borrow to cover loan requirements for the current plus the following two years. In view of the change to the LTP allocation from borrowing to grants this is now irrelevant and will only be applied if any new major schemes are approved. Such approval will therefore be sought at that time.
- 25 The attached Annex shows the calculation of the following prudential indicators:
  - a. The ratio of debt charges to overall expenditure. This is not significant to the Combined Authority as it is effectively controlled through the level of the levy (as referred to above).
  - b. The operational boundary should reflect the maximum anticipated level of external debt consistent with budgets and cash flow forecasts. It should be seen as a management tool for on-going monitoring of external debt, and may be breached temporarily due to unusual cash flow movements.

- c. The authorised limit represents the legislative limit on the Combined Authority's external debt under the Local Government Act 2003. It should be set with sufficient headroom above the operational boundary to allow flexibility for planned borrowing to be undertaken, in order for prudent treasury management decisions to be taken and temporary cash flow fluctuations to be managed.
- d. The Combined Authority is required to set upper and lower limits for the maturity structure of its borrowings. This is designed to limit the risk of exposure to high interest rates by restricting the level of maturing debt in any given year. The limits represent the amount of projected borrowing that is fixed rate maturing in each period as a percentage of total projected borrowing that is fixed rate. It is proposed that these limits remain unchanged.

26 The Prudential Code requires Members to have an approved Treasury Management Policy (this is set out above) and to agree limits for variable and fixed rate loans. It is recommended that the maximum limit for variable rate loans continues to be set at 40% and the limit for fixed rate loans remains at 200%. This reflects the current position that arises from the increase in cash balances and investments resulting from an increase in advance grant funding.

**Capital Budgets (indicative)**
